SEM II

Walchand College of Engineering, Sangli

(Government Aided Autonomous Institute)

AY 2024-25

Course Information

Programme	B.Tech.
Class, Semester	Second Year (CSE and IT), Sem IV
Course Code	7IT221
Course Name	Fuzzy Set and Statistics
Desired Requisites:	Mathematics course at Higher Secondary Level

Teaching Scheme		**Examination Scheme (Marks)**			
Lecture	3 Hrs/week	**MSE**	**ISE**	**ESE**	**Total**
Tutorial	-	30	20	50	100
		Credits: 03			

Course Objectives

1	Familiarize the students with techniques in probability and statistics.
2	Design a statistical hypothesis about the real world problem and conduct appropriate test for drawing valid inference about the population characteristics.
3	To give insights about the properties, operations and relations on Fuzzy sets.

Course Outcomes (CO) with Bloom's Taxonomy Level

At the end of the course, the students will be able to

CO	**Course Outcome Statements**	**Bloom's Taxonomy Level**	**Bloom's Taxonomy Descriptor**
CO1	Understand the concept of Fuzzy sets with case studies.	II	Understanding
CO2	Understand probability distributions for discrete and continuous random variable.	II	Understanding
CO3	Apply various discrete & continuous distributions to solve real life problems.	III	Applying
CO4	Apply numerical descriptions of data, measures of central tendency, measures of dispersion.	III	Applying
CO5	Test hypothesis particularly about mean and proportion and goodness of fit to make decisions in real life problems using concepts of Sampling distribution.	III	Applying

Module	**Module Contents**	**Hours**
I	**Fuzzy Sets:** Introduction to characteristics functions, First decomposition theorem, Fuzzy relations, examples, Fuzzy equations, Operations on Fuzzy sets.	**7**
II	**Random Variable:** Definition, Discrete random variable, Continuous random variable, Probability mass function, Probability density function, cumulative distribution function for discrete random variable and continuous random variable, bivariate discrete random variable, joint probability distribution, joint distribution function of two dimensional discrete random variable.	**7**

III	**Probability Distribution :** Poisson distribution, Gaussian (Normal) distribution, Exponential distribution, Examples.	**6**
IV	**Basic Statistics:** Introduction, Measures of Central tendency, Measures of dispersion, moments, skewness and kurtosis.	**6**
V	**Sampling Distribution:** Population, Sample, Random samples, Methods of sampling, large sample, small sample, parameter, statistic, standard error of Statistic, sampling distribution of mean, sampling distribution of proportion, Examples. Hypothesis, null and alternative hypothesis, critical region, level of significance, Types of error, one tailed test, two tailed test.	**7**
VI	**Applied Statistics:** Test of significance for large samples, Hypothesis testing for single population proportion, hypothesis testing for single population mean, Examples, Test of significance for small samples, degrees of freedom, student t distribution: Definition and its properties, Test the significance of mean of random sample, Examples, Chi-square distribution: Definitions and its properties, chi square test, chi square test of goodness of fit, Examples.	**6**

CO-PO Mapping

	Programme Outcomes (PO)												**PSO**	
	1	2	3	4	5	6	7	8	9	10	11	12	1	2
CO1	3	1	1										2	
CO2	2	2		3										3
CO3	2		2	2									1	
CO4	3	2	1	3									3	2
CO5	3	1	2	2										

The strength of mapping is to be written as 1: Low, 2: Medium, 3: High
Each CO of the course must map to at least one PO.

Walchand College of Engineering, Sangli
(Government Aided Autonomous Institute)

AY 2024-25

Course Information

Programme	B.Tech. (Information Technology)
Class, Semester	Second Year B. Tech., Sem IV
Course Code	7IT222
Course Name	Software Engineering
Desired Requisites:	Object Oriented Language

Teaching Scheme		**Examination Scheme (Marks)**			
Lecture	2 Hrs/week	**ISE**	**MSE**	**ESE**	**Total**
Tutorial	-	20	30	50	100
		Credits: 2			

Course Objectives

1	To introduce the concepts of software development process
2	To illustrate process of software project management
3	To explain software quality through testing

Course Outcomes (CO) with Bloom's Taxonomy Level

At the end of the course, the students will be able to,

CO	**Course Outcome Statement/s**	**Bloom's Taxonomy Level**	**Bloom's Taxonomy Description**
CO1	Choose appropriate process model for software development life cycle (SDLC)	III	Applying
CO2	Study various phases of SDLC like Analysis, Design, Implementation, and Testing	IV	Analyzing
CO3	Compare various types of testing for software quality assurance	IV	Analyzing
CO4	Estimate cost of software deployment using various components and frameworks	V	Evaluating

Module	**Module Contents**	**Hours**
I	**Introduction to Software Processes** The S/W problem, the software Engineering Approach & Benefits. Software Process, Characteristics of a software process. Software requirements, problem Analysis, Requirements Specification.	4
II	**Software Project Management** Cost estimation, project scheduling, staffing and personnel planning, Software Configuration Management plans, Quality Assurance plans, Project Monitoring Plans, Risk Management	4
III	**Software Design** Objective, Design principles, module level concepts, Design notation and specifications, Classes, Relationships, Common mechanisms. Diagrams, Class Diagrams, Interfaces, Use case diagram, Sequence Diagram and State Diagrams	5
IV	**Agile Processes** Agile Methodologies, Dynamic system development, Feature-driven Design, Crystal Agile Modelling.	4
V	**Software Testing** Testing Fundamentals (manual and automated testing), Testing Levels, Functional testing, Structural testing, Testing object oriented Programs, Regression Testing, Types of testing tools	5

VI	**Software Deployment** Components, Deployment, Collaboration, Patterns and Frame works, Component Diagrams and Deployment Diagrams	4

CO-PO Mapping

	Programme Outcomes (PO)												PSO	
	1	2	3	4	5	6	7	8	9	10	11	12	1	2
CO1	3	1		2									2	
CO2	2	2	1											3
CO3	2		3	1									1	
CO4	3	2		3									3	2

The strength of mapping is to be written as 1: Low, 2: Medium, 3: High
Each CO of the course must map to at least one PO.

Assessment

The assessment is based on MSE, ISE and ESE.
MSE shall be typically on modules 1 to 3.
ISE shall be taken throughout the semester in the form of teacher's assessment. Mode of assessment can be field visit, assignments etc. and is expected to map at least one higher order PO.
ESE shall be on all modules with around 40% weightage on modules 1 to 3 and 60% weightage on modules 4 to 6.
For passing a theory course, Min. 40% marks in (MSE+ISE+ESE) are needed and Min. 40% marks in ESE are needed. (ESE shall be a separate head of passing)

Walchand College of Engineering, Sangli
(Government Aided Autonomous Institute)

AY 2024-25

Course Information

Programme	B.Tech. (Information Technology)
Class, Semester	Second Year B. Tech., Sem IV
Course Code	7IT223
Course Name	Operating System
Desired Requisites:	Computer Architecture

Teaching Scheme		**Examination Scheme (Marks)**			
Lecture	3 Hrs/week	**ISE**	**MSE**	**ESE**	**Total**
Tutorial	-	20	30	50	100
	-	**Credits: 3**			

Course Objectives

1	To Introduce concepts, functions and services of operating systems.
2	To inculcate the concepts of inter-process communication techniques.
3	To compare various memory management techniques of operating systems.
4	To explore file system structures and storage management

Course Outcomes (CO) with Bloom's Taxonomy Level

At the end of the course, the students will be able to,

CO	**Course Outcome Statement/s**	**Bloom's Taxonomy Level**	**Bloom's Taxonomy Description**
CO1	Discuss various services provided by operating system to manage system resources	II	Understanding
CO2	Classify various process scheduling algorithm for multiprogramming	III	Applying
CO3	Study memory management techniques for logical to physical address	IV	Analysing
CO4	Analyse the file system management of operating systems	IV	Analysing

Module	**Module Contents**	**Hours**
I	**Introduction :** Notion of operating systems, Computer system organization, Computer System architecture, Computer System Structure, Operating System Operations, Process Management, Memory Management, Storage Management, protection and security. **System Structure:** Operating system services, user operating system interface, system calls, types of system calls, system programs, operating system design and implementation, operating system structure.	5
II	**Process** Process Concept, Process Scheduling, Operation on process, Cooperating process, Threads, Inter-process Communication (Algorithms evaluation). **Process Scheduling:** Basic concept, Scheduling Criteria, Scheduling Algorithms (FCFS, SJF, RR, Priority, Multilevel Queue Scheduling) , Multiple processor scheduling, Real time scheduling.	8
III	**Inter-process Synchronization** Background, Classical problems of synchronization, Critical Region, The critical section problem, Peterson's Solution, Synchronization Hardware, Monitors, Semaphores.	6

IV	**Deadlocks** System modes, Deadlock characterization, Methods for handling deadlocks Deadlock prevention, Deadlock avoidance, Deadlock detection, Recovery from deadlock.	5
V	**Memory Management** Background, Logical Versus Physical Address space, Swapping Contiguous Allocation, Paging, Segmentation, Segmentation with paging. **Virtual Memory:** Background, Demand paging, Page replacement, Page Replacement Algorithms (FIFO, LRU, Optimal), Allocation of frames, thrashing (Only concept), Demand segmentation. Memory Management in Various Operating Systems	8
VI	**File System Management** File concept, access methods, directory and disk structure, file-system mounting, file sharing, protection. File system structure, file-system implementation, directory implementation, Allocation Methods (Contiguous, Linked, Indexed), free-space management	6

AY 2024-25

Course Information

Programme	B.Tech. (Information Technology)
Class, Semester	Second Year B. Tech., Sem IV
Course Code	7IT224
Course Name	Theory of Computation
Desired Requisites:	Discrete Mathematics

Teaching Scheme		**Examination Scheme (Marks)**			
Lecture	3 Hrs/week	**ISE**	**MSE**	**ESE**	**Total**
Tutorial	-	20	30	50	100
		Credits: 3			

Course Objectives

1	To discuss fundamentals of theoretical computer science and its applications
2	To describe formal languages, grammar and their relationships
3	To explain automata designs as language descriptors and recognizers

Course Outcomes (CO) with Bloom's Taxonomy Level

At the end of the course, the students will be able to,

CO	**Course Outcome Statement/s**	**Bloom's Taxonomy Level**	**Bloom's Taxonomy Description**
CO1	Draw directed graphs by labelling the path between nodes	I	Remembering
CO2	Outline problem formulation by following relevant solving approaches	II	Understanding
CO3	Demonstrate grammar productions and parsing by practicing derivation trees	III	Applying
CO4	Distinguish language based problems by identifying suitable solutions and complexity classes	IV	Analysing
CO5	Design abstract machines for language acceptance by recognizing its probable applications	VI	Creating

Module	**Module Contents**	**Hours**
I	**Proofs and Regular Languages** Types of Proofs, Mathematical Induction and Recursive definitions, Regular expressions & Regular languages, Operations on Regular languages	6
II	**Finite State Machines** Deterministic Finite Automata (DFA) representation, DFA design examples, Nondeterministic finite automata (NFA), NFA with Null (^) transitions, Equivalence of DFAs, NFAs and NFA-^s. Kleene's Theorem & Proofs, Minimization of DFA	8
III	**Grammar & Languages** Definition and Types of grammars and languages, Derivation trees and ambiguity, Context Free Languages (CFL) & Non CFL's., Union, Concatenation and Kleene's operations, Intersection and complements of CFLs, Pumping Lemma.	6
IV	**Push Down Automata (PDA)** Definition, Deterministic PDA, Types of acceptance and conversions to each other, PDA design examples, CFGs & PDAs., Top-Down, & Bottom-up parsing	7

V	**Chomsky Normal Form (CNF)** Context Free Grammar (CFG) & CNF notations, eliminating ^ production and unit productions from a CFG, Eliminating useless variables from CFG, CNF Significance, Applications	5
VI	**Turing Machines (TM)** Models of Computation, definition of TM as Language Acceptor, Combining TMs, Turing computable functions, TM design examples, Variations in TM, nondeterministic TM, and Universal TM.	7

AY 2024-25

Course Information

Programme	B.Tech. (Information Technology)
Class, Semester	Second Year B. Tech., Sem III/IV
Course Code	7IT271
Course Name	Java Programming Lab
Desired Requisites:	Object Oriented Programming

Teaching Scheme		**Examination Scheme (Marks)**			
Practical	2 Hrs/ Week	**LA1**	**LA2**	**Lab ESE**	**Total**
		30	30	40	100
Lecture	1 Hrs/week	**Credits: 2**			

Course Objectives

1	To introduce the object-oriented concepts of Java
2	To inculcate the Java APIs like multithreading and socket programming
3	To instruct about various applications of the GUI packages of Java

Course Outcomes (CO) with Bloom's Taxonomy Level

At the end of the course, the students will be able to,

CO	Course Outcome Statement/s	Bloom's Taxonomy Level	Bloom's Taxonomy Description
CO1	Demonstrate concepts of Object Oriented Technology using java programming	III	Applying
CO2	Apply multi-threading and socket programming concepts to solve real time problems	III	Applying
CO3	Analyse the concepts of event handling in java using AWT	IV	Analyzing
CO4	Design and implement GUI using java swing	V	Creating

Module	Module Contents	Hours
I	**Fundamental Programming in Java** Structure of Java Program, Java programming environment-JVM, JIT Compiler, Bytecode, A simple Java program, source file declaration rules, naming conventions, objects and classes – declaring classes and objects, declaring member variables, defining methods, constructors, using objects, this keyword, final and static keyword, garbage collection	3
II	**Inheritance and package** What is inheritance, types of inheritance, interfaces, super keyword, final classes and methods, packages – importing packages, naming a package, creating a package	2
III	**Exception Handling and I/O** Exception handling – what is exception? dealing with errors, hierarchy of exception, types of exceptions, IO stream classes	2
IV	**Event Handling, AWT and Swing** Event handling – basics of event handling, AWT hierarchy, types of events, AWT components, swing advanced components.	2
V	**Multithreading and Networking** Processes and threads, runnable interface, thread class, thread objects, thread states, thread priorities, socket programming	2
VI	**Database Handling and Collections Framework** Database – design of JDBC, the structured query language, JDBC types, Driver Manager - statement, connection, result-set, Collections - Collection framework	2

List of Experiments / Lab Activities/Topics

List of Experiments:

1. Program on input/output stream.
2. Program on class and objects.
3. Program on Constructor/Destructors.
4. Program static variables/class/functions.
5. Program on polymorphism.
6. Program on different types of inheritance and interface.
7. Program on exception handling objects.
8. Program on multithreading.
9. Program on TCP/UDP communication.
10. Program on Swing components.
11. Program on AWT components.
12. Program on Database Connectivity and operations for data handling.
13. Program on different collections like TreeSet, Set, HashMap, ArrayList, Date,etc.

CO-PO Mapping

	Programme Outcomes (PO)												**PSO**	
	1	2	3	4	5	6	7	8	9	10	11	12	1	2
CO1		2		1	1								2	
CO2					3				2					2
CO3	1		2	2	2								3	1
CO4	2			1	3				2				1	2

The strength of mapping is to be written as 1,2,3; where, 1: Low, 2: Medium, 3: High
Each CO of the course must map to at least one PO, and preferably to only one PO.

Assessment

There are three components of lab assessment, LA1, LA2 and Lab ESE.
IMP: Lab ESE is a separate head of passing.(min 40 %), LA1+LA2 should be min 40%

Assessment	**Based on**	**Conducted by**	**Typical Schedule**	**Marks**
LA1	Lab activities, attendance, journal	Lab Course Faculty	During Week 1 to Week 8 Marks Submission at the end of Week 8	30
LA2	Lab activities, attendance, journal	Lab Course Faculty	During Week 9 to Week 16 Marks Submission at the end of Week 16	30
Lab ESE	Lab activities, journal/ performance	Lab Course Faculty and External Examiner as applicable	During Week 18 to Week 19 Marks Submission at the end of Week 19	40

Week 1 indicates starting week of a semester. Lab activities/Lab performance shall include performing experiments, mini-project, presentations, drawings, programming, and other suitable activities, as per the nature and requirement of the lab course. The experimental lab shall have typically 8-10 experiments and related activities if any.

Walchand College of Engineering, Sangli

(Government Aided Autonomous Institute)

AY 2024-25

Course Information

Programme	B.Tech. (Information Technology)
Class, Semester	Second Year B. Tech., Sem III/IV
Course Code	7IT272
Course Name	Android Programming Lab
Desired Requisites:	Object oriented Programming concepts

Teaching Scheme		**Examination Scheme (Marks)**			
Lecture	1 Hrs/ Week	**LA1**	**LA2**	**Lab ESE**	**Total**
Practical	2 Hrs/ Week	30	30	40	100
		Credits: 2			

Course Objectives

1	To introduce the android architecture and tools for developing Android applications
2	To impart current client side and server side web technologies on Android platform
3	To provide user interface application development

Course Outcomes (CO) with Bloom's Taxonomy Level

At the end of the course, the students will be able to,

CO	**Course Outcome Statement/s**	**Bloom's Taxonomy Level**	**Bloom's Taxonomy Description**
CO1	Describe the life cycles of android application development	III	Applying
CO2	Choose appropriate database for android application	III	Applying
CO3	Use the major components of Android API to develop application	IV	Analysing
CO4	Deploy applications to the Android marketplace for distribution	VI	Creating

Module	**Module Contents**	**Hours**
I	**Android Overview** Introduction to mobile computing, installing of required software and preparing the working environment, creating your first Android Application	2
II	**Intents and Layouts** XML, Android View Hierarchies, Linear Layouts, Relative Layout, Table Layout, Frame Layout Sliding, Using Padding and Margins with Layouts. What is Intent? Android Intent Messaging via Intent Objects, Types of Intents, Using Intents with Activities, Sending Intents (Telephony, SMS), Broadcast Receivers	3
III	**Input Controls, Input Events, Dialogs** Buttons, Text Fields, Checkboxes, Radio Buttons, Toggle Buttons, Spinners, Event Listeners, Event Handlers, Touch Mode, Handling Focus, Dialogs: Alerts, Popups, Toasts	2
IV	**Menus, Notification and Action Bar** Menus, Options menu, Context menu, Popup menu, Handling menu click events, Creating a Notification, Notification actions, Notification priority, Managing Notifications, Removing notifications	2
V	**Android Database** Installing SQLite plugin, DB Helper, The Database Schema and Its Creation, Four Major Operations, Cursors, Example, overview of other database used for Android	2

VI	**Publishing Android Application.** To deploy and publish the Mobile Apps, Introduction to Flutter and Kotlin, Permissions, Application resources.	2

List of Experiments / Lab Activities/Topics

List of Lab Activities:

List of Lab Activities:

1. Installation of Android SDK, emulator, creating simple project and study of android project structure.
2. Installing apk on mobile device/tablet, configuring mobile device/tablet in Android Studio with developer option and running app directly on mobile device/tablet.
3. Write a program to use of different layouts.(Create Login form using Linear Layout and Relative Layout).
4. Write a program to study Intents for switching between activities. - Create Registration Activity and Registration Layout
5. Write a program to use of Intents for SMS and Telephony
6. Write a program to study and demonstrate BroadcastReceiver
7. Write a program to demonstrate Buttons, Text Fields, Checkboxes, Radio Buttons, and Toggle Buttons with their events handler (Create an app which will cover the different components, and try adding the components and different events henceforth so as to create a fully developed Android application)
8. Write a program to demonstrate Spinners, Touch Mode, Alerts, Popups, and Toasts with their events handler
9. Write a program to demonstrate Touch Mode, Menus with their events handler
10. Write a program to demonstrate notification with their action
11. Write a program to study and use of SQLite database
12. Study of publishing app to the Android Market.

Course Information

Programme	B.Tech. (Information Technology)
Class, Semester	Second Year B. Tech., Sem IV
Course Code	7VSIT245
Course Name	Mini Project 1
Desired Requisites:	Programming fundamentals

Teaching Scheme		**Examination Scheme (Marks)**			
Practical	2 Hrs/ Week	**LA1**	**LA2**	**Lab ESE**	**Total**
	-	30	30	40	100
		Credits: 1			

Course Objectives

1	To provide guidance to select & build the ideas.
2	To help students to address real-world challenges by IT based Solution.
3	To guide students to acquaint with team spirit.

Course Outcomes (CO) with Bloom's Taxonomy Level

At the end of the course, the students will be able to,

CO	**Course Outcome Statement/s**	**Bloom's Taxonomy Level**	**Bloom's Taxonomy Description**
CO1	Exploit the concepts of Programming languages, tools and technologies	III	Applying
CO2	Analyze performance of mobile application	IV	Analyzing
CO3	Survey existing challenges & try to address it	V	Evaluating
CO4	Design project modules to report solutions to various problems.	VI	Creating

List of Experiments / Lab Activities/Topics

List of Lab Activities:

Mini-project is to be carried out in a group of maximum 3 to 5 students.
Each group will carry out mini-project on developing any mobile application software based on following areas.
1. Android/C/C++/Python or any equivalent language.
2. Industry Problem Statement (Sponsored Project)
3. Problem statements based on current or previously learned Technology.
4. Data analysis using spreadsheets

Project/Mini-Project group should submit workable project at the end of second semester.
Project report (pre-defined template) should be prepared using Latex/Word and submitted along with soft copy on CD/DVD (with code, PPT, PDF, Text report document & reference material) or on online Github.
Students should maintain a project log book containing weekly progress of the project.

CO-PO Mapping														
	Programme Outcomes (PO)												PSO	
	1	2	3	4	5	6	7	8	9	10	11	12	1	2
CO1		1			2								3	
CO2	2		2		3						2		2	1
CO3	2	1		3	3					3	1			3
CO4		2		2	3					1				

The strength of mapping is to be written as 1,2,3; where, 1: Low, 2: Medium, 3: High
Each CO of the course must map to at least one PO, and preferably to only one PO.

Assessment

There are three components of lab assessment, LA1, LA2 and Lab ESE.
IMP: Lab ESE is a separate head of passing.(min 40 %), LA1+LA2 should be min 40%

Assessment	Based on	Conducted by	Typical Schedule	Marks
LA1	Lab activities, attendance, journal	Lab Course Faculty	During Week 1 to Week 8 Marks Submission at the end of Week 8	30
LA2	Lab activities, attendance, journal	Lab Course Faculty	During Week 9 to Week 16 Marks Submission at the end of Week 16	30
Lab ESE	Lab activities, journal/ performance	Lab Course Faculty and External Examiner as applicable	During Week 18 to Week 19 Marks Submission at the end of Week 19	40

Week 1 indicates starting week of a semester. Lab activities/Lab performance shall include performing experiments, mini-project, presentations, drawings, programming, and other suitable activities, as per the nature and requirement of the lab course. The experimental lab shall have typically 8-10 experiments and related activities if any.

Walchand College of Engineering, Sangli

(Government Aided Autonomous Institute)

AY 2024-25

Course Information

Programme	B.Tech. (Information Technology)
Class, Semester	Second Year B. Tech., Semester IV
Course Code	7MDIT221
Course Name	Data Structures and Algorithms
Desired Requisites:	

Teaching Scheme		**Examination Scheme (Marks)**			
Lecture	3 Hrs/week	**ISE**	**MSE**	**ESE**	**Total**
Tutorial	-	20	30	50	100
		Credits: 3			

Course Objectives

1	Exploring basics of data structures and algorithms.
2	Introduces a variety of data structures such as hash tables, search trees, tries, heaps, graphs
3	Familiarize sorting and pattern matching algorithms

Course Outcomes (CO) with Bloom's Taxonomy Level

At the end of the course, the students will be able to,

CO	**Course Outcome Statement/s**	**Bloom's Taxonomy Level**	**Bloom's Taxonomy Description**
CO1	Apply various data structures for problem solving	III	Applying
CO2	Apply important algorithmic design paradigms and methods of analysis	III	Applying
CO3	Compare various Searching and sorting techniques	IV	Analyzing
CO4	Evaluate efficiency of the programs based on performance of the algorithm	V	Evaluating

Module	**Module Contents**	**Hours**
I	**Introduction** Basic Concepts: Algorithm, Pseudo-code, ADT, Data Structure, Algorithmic Efficiency, And Recursion, Dynamic Memory allocation, Introduction of Pointers to Arrays ,functions and Structures	4
II	**Linear Lists, Stacks and Queues** Sequential and linked implementations, equivalence problem, linked lists, doubly linked lists, circular lists	6
III	**Non-Linear Structures** Basic terminology, binary trees and its representation, binary tree traversals , operations	8
IV	**Searching and Sorting Techniques:** Importance of searching, Sequential, Binary, Insertion Sort, Bubble Sort, Quick sort and Merge sort	8
V	**Introduction to Computer Algorithm** Design and Analysis of Algorithm Greedy Algorithms: Knapsack problem, Huffman codes, Dynamic Programming	7
VI	**Backtracking Programming** Concept, Advantages & Disadvantages, Applications, Implementation using problems like N-Queen Problem	6

CO-PO Mapping

	Programme Outcomes (PO)												PSO	
	1	2	3	4	5	6	7	8	9	10	11	12	1	2
CO1	3	2												2
CO2	2	3			1								1	
CO3		1	2		2								3	
CO4	3	2	1											1

The strength of mapping is to be written as 1: Low, 2: Medium, 3: High
Each CO of the course must map to at least one PO.

Assessment

The assessment is based on MSE, ISE and ESE.
MSE shall be typically on modules 1 to 3.
ISE shall be taken throughout the semester in the form of teacher’s assessment. Mode of assessment can be field visit, assignments etc. and is expected to map at least one higher order PO.
ESE shall be on all modules with around 40% weightage on modules 1 to 3 and 60% weightage on modules 4 to 6.
For passing a theory course, Min. 40% marks in (MSE+ISE+ESE) are needed and Min. 40% marks in ESE are needed. (ESE shall be a separate head of passing)
