Walchand College of Engineering, Sangli

(Government Aided Autonomous Institute)

AY 2024-25

Course Information	
Programme	B.Tech.
Class, Semester	Second Year (CSE and IT), Sem IV
Course Code	7MA205
Course Name	Fuzzy Set and Statistics/ Applied Mathematics for CSE
Desired Requisites:	Mathematics course at Higher Secondary Level

Teaching Scheme		**Examination Scheme (Marks)**			
Lecture	3 Hrs/week	**MSE**	**ISE**	**ESE**	**Total**
Tutorial	-	30	20	50	100
Practical	-	**Credits: 3**			

Course Objectives

1	Familiarize the students with techniques in probability and statistics.
2	Design a statistical hypothesis about the real world problem and conduct appropriate test for drawing valid inference about the population characteristics.
3	To give insights about the properties, operations and relations on Fuzzy sets.

Course Outcomes (CO) with Bloom's Taxonomy Level

At the end of the course, the students will be able to

CO	**Course Outcome Statements**	**Bloom's Taxonomy Level**	**Bloom's Taxonomy Descriptor**
CO1	**understand** the concept of Fuzzy sets with case studies.	II	Understanding
CO2	**understand** probability distributions for discrete and continuous random variable.	II	Understanding
CO3	**apply** various discrete & continuous distributions to solve real life problems.	III	Applying
CO4	**apply** numerical descriptions of data, measures of central tendency, measures of dispersion.	III	Applying
CO5	**test** hypothesis particularly about mean and proportion and goodness of fit to make decisions in real life problems using concepts of Sampling distribution.	III	Applying

Module	**Module Contents**	**Hours**
I	**Fuzzy Sets:** Introduction to characteristics functions, First decomposition theorem, Fuzzy relations, examples, Fuzzy equations, Operations on Fuzzy sets.	**7**

II	**Random Variable:** Definition, Discrete random variable, Continuous random variable, Probability mass function, Probability density function, cumulative distribution function for discrete random variable and continuous random variable, bivariate discrete random variable, joint probability distribution, joint distribution function of two dimensional discrete random variable.	**7**
III	**Probability Distribution :** Poisson distribution, Gaussian (Normal) distribution, Exponential distribution, Examples.	**6**
IV	**Basic Statistics:** Introduction, Measures of Central tendency, Measures of dispersion, moments, skewness and kurtosis.	**6**
V	**Sampling Distribution:** Population, Sample, Random samples, Methods of sampling, large sample, small sample, parameter, statistic, standard error of Statistic, sampling distribution of mean, sampling distribution of proportion, Examples. Hypothesis, null and alternative hypothesis, critical region, level of significance, Types of error, one tailed test, two tailed test.	**7**
VI	**Applied Statistics:** Test of significance for large samples, Hypothesis testing for single population proportion, hypothesis testing for single population mean, Examples, Test of significance for small samples, degrees of freedom, student t distribution: Definition and its properties, Test the significance of mean of random sample, Examples, Chi-square distribution: Definitions and its properties, chi square test, chi square test of goodness of fit, Examples.	**6**

CO-PO Mapping

	Programme Outcomes (PO)												PSO	
	1	2	3	4	5	6	7	8	9	10	11	12	1	2
CO1	2													
CO2	2													
CO3	2													
CO4	2													
CO5	2													

The strength of mapping is to be written as 1: Low, 2: Medium, 3: High
Each CO of the course must map to at least one PO.

Assessment

The assessment is based on MSE, ISE and ESE. MSE shall be typically on modules 1 to 3. ISE shall be taken throughout the semester in the form of teacher's assessment. Mode of assessment can be field visit, assignments etc. and is expected to map at least one higher order PO. ESE shall be on all modules with around 40% weightage on modules 1 to 3 and 60% weightage on modules 4 to 6. For passing a theory course, Min. 40% marks in (MSE+ISE+ESE) are needed and Min. 40% marks in ESE are needed. (ESE shall be a separate head of passing)

Walchand College of Engineering, Sangli

(Government Aided Autonomous Institute)

AY 2024-25

Course Information	
Programme	B.Tech. (All Branches)
Class, Semester	Second Year B. Tech., Sem IV
Course Code	7AE201
Course Name	Employability Skills Development (ESD)
Desired Requisites:	Nil

Teaching Scheme		**Examination Scheme (Marks)**			
Lecture	Hrs/week	**MSE**	**ISE**	**ESE**	**Total**
Tutorial	-	30	20	50	100
Practical	-	**Credits: 2**			

Course Objectives

1	To improve the problem-solving skills of students.
2	To understand the approach towards problem solving
3	Understanding the sectional cut-offs for different companies

Course Outcomes (CO) with Bloom's Taxonomy Level

At the end of the course, the students will be able to,

CO	**Course Outcome Statement/s**	**Bloom's Taxonomy Level**	**Bloom's Taxonomy Description**
CO1	Ability to improve the accuracy percentage		
CO2	Understand the current changing recruitment trends		
CO3	Understanding the differential marking scheme in papers		
CO4	Performance improvement in competitive exams like CAT, GATE		

Module	**Module Contents**	**Hours**
I	**Arithmetic I** Ratio, Proportion, Mark Up & Discount, Averages, Mixtures & Alligations, Simple & Compound Interest	6

II	**Arithmetic II** Percentages, Profit & Loss, Time & Work, Time, Speed & Distance, Boat & Streams, Linear Races. **Numbers** Cyclicity, Remainders, Cyclicity of Remainders, Indices, Factors, LCM, HCF.	12
III	**Permutation, Combination, Probability** Fundamental principal of counting, Arrangements, Selection, Grouping, Distribution, Independent Events, Conditional Probability, Binomial Distribution	6
IV	**Logical Reasoning** Clocks, Calendars, Games & Tournaments, Analytical Puzzles, Binary Logic, Blood relations, Directions, Coding, Decoding, Seating Arrangement (Linear, Circular & Rectangular)	6
V	**Verbal Ability I** Vocabulary - Synonyms, Antonyms, Analogies Reading Comprehension, Para Jumbles	6
VI	Verbal Ability II Parts of Speech, Tenses, Subject Verb Agreement	4

CO-PO Mapping

	Programme Outcomes (PO)												PSO	
	1	2	3	4	5	6	7	8	9	10	11	12	1	2
CO1											3			
CO2							2							
CO3									3					
CO4										3				
The strength of mapping is to be written as 1: Low, 2: Medium, 3: High Each CO of the course must map to at least one PO.														

Assessment
The assessment is based on the MCQ test which will be conducted online through the platform and it will be a proctored test. No negative marking will be there in the test. Test will be of 60 minutes with 20 questions each on Quantitative Aptitude, Logical Reasoning & Verbal Ability

Walchand College of Engineering, Sangli

(Government Aided Autonomous Institute)

AY 2024-25

Course Information	
Programme	B.Tech. (All Branches)
Class, Semester	Second Year B. Tech., Sem IV
Course Code	7VE201
Course Name	Value Education
Desired Requisites:	Open mind and a willingness to learn

Teaching Scheme		**Examination Scheme (Marks)**			
Lecture	2 Hrs/week	LA1	LA2	ESE	Total
Tutorial	-	30	30	40	100
Practical	-	**Credits: 2**			

Course Objectives

1	Develop holistic personal and professional skills by enhancing communication, emotional intelligence, and resilience to foster positive relationships and sustainable living practices.
2	Promote ethical and sustainable leadership through the application of integrity, teamwork, and a growth mindset to navigate success and failure while mastering effective presentation and communication skills.
3	Empower lifelong learning and contribution by reflecting on personal values, engaging in critical thinking, and committing to continuous self-assessment and professional development for addressing global challenges.

Course Outcomes (CO) with Bloom's Taxonomy Level

At the end of the course, the students will be able to,

CO	**Course Outcome Statement/s**	**Bloom's Taxonomy Level**	**Bloom's Taxonomy Description**
CO1	learn effective communication, empathy, and relationship-building skills to foster positive interactions in personal andprofessional settings.	I	Rememberin g
CO2	incorporate sustainable habits into daily life and build resiliencethrough mindfulness and stress management to handle challenges and support environmental stewardship.	II	Understandi ng
CO3	develop goal-setting and achievement strategies, manage success and failure, and deliver impactful presentations for overall personal and professional development.	III	Applying
CO4	strengthen analytical skills and creative problem-solving techniques to make informed decisions and tackle complex issues in various contexts.	IV	Analyzing

Module	**Module Contents**	**Hours**

I	**Interpersonal skills** Introduction to Relationships, Communication Skills, Emotional Intelligence, Conflict Resolution, Maintaining Healthy Relationships	5
II	**Sustainable Living** Introduction to Sustainability, Environmental Impact, Sustainable Practices, Community Involvement, Personal Action Plan	5
III	**Inner Peace and Resilience** Understanding Inner Peace, Mindfulness and Meditation, Stress Management, Building Resilience, Positive Mindset	5
IV	**The Art of Winning** Winning Mindset, Goal Setting, Perseverance and Adaptability, Teamwork and Leadership, Case Studies and Real-life Examples	5
V	**Success and Failure Management** Understanding Success and Failure, Learning from Failure, Growth Mindset, Balancing Success and Failure, Personal Development Plan	5
VI	**The Art of Presentation** Introduction to Presentations, Content Organization, Verbal and Non-Verbal Communication, Practice and Delivery, Feedback and Improvement	5

CO-PO Mapping

	Programme Outcomes (PO)												**PSO**	
	1	2	3	4	5	6	7	8	9	10	11	12	1	2
CO1	-	-	-	-	-	-	-	2	2	3	-	2		
CO2	-	-	-	-	-	2	3	2	2	-	-	2		
CO3	-	-	-	1	-	1	-	2	3	2	2	2		
CO4	-	-	-	3	2	2	2	2	2	2	3	2		

The strength of mapping is to be written as 1: Low, 2: Medium, 3: High
Each CO of the course must map to at least one PO.

Assessment

The assessment is based on LA1, LA2 and ESE. LA1 shall be typically on modules 1 to 3.
LA2 shall be taken throughout the semester in the form of teacher's assessment. Mode of assessment can be Tests, assignments, oral, seminar etc. and is expected to map at least one higher order PO.
ESE shall be on all modules with around 30 - 40% weightage on modules 1 to 3 and 60 - 70% weightage on modules 4 to 6.
For passing a theory course, Min. 40% marks in (LA1+LA2+ESE) are needed and Min. 40% marks in ESE
are needed. (ESE shall be a separate head of passing)

Walchand College of Engineering, Sangli

(Government Aided Autonomous Institute)

AY 2024-25

Course Information

Programme	B.Tech. (Computer Science and Engineering)
Class, Semester	Second Year B. Tech., Sem IV
Course Code	7CS221
Course Name	Operating Systems
Desired Requisites:	Nil

Teaching Scheme		**Examination Scheme (Marks)**			
Lecture	3 Hrs/week	**MSE**	**ISE**	**ESE**	**Total**
Tutorial	-	30	20	50	100
Practical	-	**Credits: 3**			

Course Objectives

1	To introduce students with basic concepts of operating system, system software, threads and their communication.
2	To familiarize the students with various views and management policies adopted by O.S. as pertaining with processes , Deadlock , memory , File and I/O operations.
3	To provide the knowledge of basic concepts towards process synchronization, Mutual exclusion algorithms and deadlock detection algorithms and related issues.
4	To inculcate the importance of memory management, storage management and I/O device management in OS design.

Course Outcomes (CO) with Bloom's Taxonomy Level

At the end of the course, the students will be able to,

CO	**Course Outcome Statement/s**	**Bloom's Taxonomy Level**	**Bloom's Taxonomy Description**
CO1	Describe the primitive concepts of Operating System services and system software functionality.	II	Understanding
CO2	Illustrate Process management core techniques in the zest of effective execution of processes.	III	Applying
CO3	Elucidate Memory management, Storage management and I/O management core techniques in efficient execution of programs to achieve user and system goals.	IV	Analyzing
CO4	Assess various algorithms of Process, Memory, Storage & I/O management for performance and quality criterion.	V	Evaluating

Module	**Module Contents**	**Hours**
I	**Overview of Operating System** Notion of operating systems ,Operating system services, user operating system interface, system calls, types of windows and UNIX system calls, system programs, operating system design and implementation, operating system structure, Virtual Machines Case Study : Windows and UNIX Operating System	6

II	**System Softwares** Notions of editors, Macro processors, Compilers, Assemblers, loaders & linkers, Multiprogramming and time sharing.	6
III	**Process Management** **Process Concept:** Process concept, process scheduling, operation on process, interprocess communication, example of IPC systems and communication in client-server systems. **Process Scheduling:** Basic concepts, scheduling criteria, scheduling algorithm, algorithm evaluation.	7
IV	**Process Coordination** **Synchronization:** Background, the critical section problem, Peterson's solution, synchronization hardware, semaphores, classic problems of Synchronization. **Deadlock:** System model, deadlock characterization, methods for handling deadlocks, deadlock prevention, deadlock avoidance, deadlock detection.	7
V	**Memory Management** **Memory-Management Strategies:** Background, swapping, contiguous memory allocation, paging, structure of the page table, Segmentation. **Virtual Memory Management:** Background, demand paging, copy-on write, page replacement algorithms, allocation of frames, Thrashing.	8
VI	**Storage Management** **File System :** File concept, access methods, directory and disk structure, file system mounting, file sharing, protection.	5

AY 2024-25

Course Information	
Programme	B.Tech. (Computer Science and Engineering)
Class, Semester	Second Year B. Tech., Sem IV
Course Code	7CS222
Course Name	Database Engineering
Desired Requisites:	Data Structures

Teaching Scheme		**Examination Scheme (Marks)**			
Lecture	3 Hrs/week	**MSE**	**ISE**	**ESE**	**Total**
Tutorial	-	30	20	50	100
Practical	-	**Credits: 3**			

Course Objectives

1	To Impart various functional components of database design, manipulation and access language, redundancy issue, storage strategy, transaction and concurrency strategy and its security and recovery system.
2	To Introduce physical and logical database designs, database modelling, relational, hierarchical and network models.
3	To Provide in depth understanding of relational model and the theoretical issues associated with relational database design.
4	To Exemplify various SQL clauses of Data manipulation, Data access and Data control.

Course Outcomes (CO) with Bloom's Taxonomy Level

At the end of the course, the students will be able to,

CO	**Course Outcome Statement/s**	**Bloom's Taxonomy Level**	**Bloom's Taxonomy Description**
CO1	explain concepts of conceptual database design, redundancy problems, storage systems, transaction processing, concurrency control, and security in DBMS.	II	Understanding
CO2	apply theoretical knowledge to design ER diagrams and prepare relational schemas using appropriate constraints and normalization for a given specification of the requirements.	III	Applying
CO3	construct SQL queries for open-source and commercial DBMS for a given specification schema to fetch essential data.	III	Applying
CO4	analyze security & recovery issues of databases.	IV	Analyzing

Module	**Module Contents**	**Hours**
I	**Introduction and Database Modelling using ER Model** **Introduction:** General introduction to database systems, its advantages and applications, Database System Architecture, Database users and Administrator, Data models, Database management system, Database languages, View of Database, Data Models. **ER Model:** Entity set, Entity types, attributes, Notations, Relationship sets, Relationship types, Keys- super key, candidate key, primary key, Extended Features of ER Model Generalization, Specialization and aggregation	6

II	**Relational Model and SQL Relational Model:** Structure of Relational Database, Reduction of ER model into Relational schemas, Schema-instance distinction, Referential integrity and foreign keys, Relational algebra, Tuple relation calculus, Domain relational calculus, Example queries, **SQL:** Introduction to SQL, Data definition statements with constraints, Insert, Update and Delete, Set Operations, Aggregate functions group by and having clauses, Nested Queries, Views, Complex Queries, Joins.	8
III	**Relational Database Design** Importance of a good schema design, Motivation for normal forms, Atomic domains and 1NF, Dependency theory - functional dependencies, Closure of a set of FD's, Definitions of 2NF, 3NF and BCNF, Decomposition algorithms and desirable properties of them, Multi-valued dependencies and 4NF, Join dependencies and definition of 5NF, Temporal Functional Dependencies	7
IV	**Data Storage and Indexing** File organization, Organization of records in files, Data Dictionary, Database Buffer, and Indexing: Concept, Ordered Indices-Primary, Secondary, Multilevel, B+ Tree Index, Hashing, Hash Indices, Dynamic hashing, Multiple key access, Bitmap Indices.	6
V	**Transaction Processing and Concurrency Control** Transaction Processing: Concept, ACID properties, Transaction states, Storage Structure, Implementation of atomicity, isolation and durability, Serializability, Testing for Serializability. **Concurrency Control:** Lock-based protocols, Timestamp - based Protocols, Validation – based Protocols, Multiple Granularities, Deadlock handling.	7
VI	**Database security and Recovery System** Authentication, Authorization and access control, Discretionary Access Control (DAC), Mandatory Access Control (MAC) and Role of the Database Administrator (RBAC) models, Intrusion detection, SQL injection. Failure classification, Recovery and Atomicity, Log based recovery, Checkpoints, Shadow Paging, Buffer management in crash recovery.	5

AY 2024-25

Course Information	
Programme	B.Tech. (Computer Science and Engineering)
Class, Semester	Second Year B. Tech., Sem IV
Course Code	7CS223
Course Name	Formal Language and Automata Theory
Desired Requisites:	Discrete Mathematics

Teaching Scheme		**Examination Scheme (Marks)**			
Lecture	3 Hrs/week	**MSE**	**ISE**	**ESE**	**Total**
Tutorial	-	30	20	50	100
Practical	-	**Credits: 3**			

Course Objectives	
1	To teach basic terminologies related to formal languages and Automata theory.
2	To provide foundation to critically analyse grammars, regular expressions, languages, and their relationship
3	To inculcate theoretical knowledge to design Automata/Machine as a language descriptor and recognizer

Course Outcomes (CO) with Bloom's Taxonomy Level

At the end of the course, the students will be able to,

CO	**Course Outcome Statement/s**	**Bloom's Taxonomy Level**	**Bloom's Taxonomy Description**
CO1	explain the concepts related to string, language ,grammar and their properties	II	Understanding
CO2	demonstrate different grammars, regular expressions and relate the languages defined by respective grammars and regular expressions	III	Applying
CO3	differentiate between distinct formal computing languages and their recognizers.	IV	Analysing
CO4	construct Finite Automata, PDA, Turing Machine to recognize respective languages.	IV	Analysing

Module	**Module Contents**	**Hours**
I	**Finite Automata:-**Introduction, Basic concepts, Languages ,Finite State Machine, Finite Automata, Deterministic Finite Automata, Non-Deterministic Finite Automata, Extended Transition Function, Equivalence of NFA and DFA, NFA with ^ transitions, minimum state FA for a regular language, minimizing number of states in an FA.	10
II	**Regular Expressions and Pumping Lemma:-**Regular expressions & corresponding regular languages, examples and its applications, unions, intersection & complements of RL, Pumping Lemma for RL, Kleene's theorem & proofs	6

III	**Context Free Languages:-**Definition and types of grammars and languages, derivation trees and ambiguity, CFL's & Non CFL's., Union, Concatenation and Kleene's operations, Intersection and complements of CFLs, Pumping Lemma & examples.	6
IV	**Normal Forms and Parsing: -**Normal forms for Context Free Grammars, BNF, CNF and GNF notations, eliminating ^ production and unit productions from a CFG, Eliminating useless variables from a Context Free Grammar. Top-Down, & Bottom-up parsing	6
V	**Push Down Automata:-**Introduction, The definition of Pushdown automata, Deterministic Pushdown automata, PDA and CFG, DPDA vs NPDA	6
VI	**Turing Machine: -**Models of computation, definition of TM as Language Acceptors, Combining Turing Machines, computing a function with a TM. Variations in TM, TMs with doubly-infinite tapes, more than one tape, Nondeterministic TM and Universal TM.	5

Practical	2 Hrs/ Week	**LA1**	**LA2**	**Lab ESE**	**Total**
Interaction	-	30	30	40	100
		Credits: 1			

Course Objectives

1	To elaborate use of conceptual database design to prepare database schemas, indexing, transaction processing, concurrency and recovery control issues associated with database management systems
2	To make the students aware of various relational databases systems and the systematic approach to apply theoretical knowledge to design practical applications to solve real world problems the small scale
3	To make the students understand SQL and to use it efficiently retrieve data from the database.

Course Outcomes (CO) with Bloom's Taxonomy Level

At the end of the course, the students will be able to,

CO	**Course Outcome Statement/s**	**Bloom's Taxonomy Level**	**Bloom's Taxonomy Description**
CO1	interpret the problem statement of an enterprise, identify the need, analyze the problem, and design an Entity-Relationship (ER) diagram for the enterprise, as well as prepare the relational database schema for the enterprise, identifying integrity constraints for efficient design using modern tools.	III	Applying
CO2	apply theoretical knowledge systematically to design databases for various applications	III	Applying
CO3	compare and use various methods of writing queries for a given problem	IV	Analyzing

CO4	evaluate and implement database security measures to protect sensitive data from unauthorized access	V	Evaluating

List of Experiments / Lab Activities/Topics	
List of Topics (Applicable for Interaction mode): **List of Lab Activities:** 1. Database Design Using ERmodel 2. Database Schema Design 3. Database Creation And Applying Integrity Constraints 4. Study of DDL statements and data manipulation statements 5. Study Basic SQL SELECT statement for displaying data from single table or multiple tables 6. Study of SQL constructs for aggregating data using group functions, subqueries and complex queries 7. Study and Implementation of Triggers 8. Study and Implementation of Stored Procedures 9. Transaction isolation level and Concurrency control 10. Few aspects of authorization much as creating and managing users, roles, granting and revoking of privileges 11. Implementation of B+ tree, hash index in C or C++

CO-PO Mapping														
	Programme Outcomes (PO)												PSO	
	1	2	3	4	5	6	7	8	9	10	11	12	1	2
CO1		2	2	2	2				1	1			3	
CO2			2	2	3				1	1			3	
CO3				3									3	
CO4			2		2								2	
The strength of mapping is to be written as 1,2,3; where, 1: Low, 2: Medium, 3: High Each CO of the course must map to at least one PO, and preferably to only one PO.														

Assessment				
There are three components of lab assessment, LA1, LA2 and Lab ESE. IMP: Lab ESE is a separate head of passing.(min 40 %), LA1+LA2 should be min 40%				
Assessment	**Based on**	**Conducted by**	**Typical Schedule**	**Marks**
LA1	Lab activities, attendance, journal	Lab Course Faculty	During Week 1 to Week 8 Marks Submission at the end of Week 8	30
LA2	Lab activities, attendance, journal	Lab Course Faculty	During Week 9 to Week 16 Marks Submission at the end of Week 16	30
Lab ESE	Lab activities, journal/ performance	Lab Course Faculty and External Examiner as applicable	During Week 18 to Week 19 Marks Submission at the end of Week 19	40
Week 1 indicates the starting week of a semester. Lab activities/Lab performance shall include performing experiments, mini-project, presentations, drawings, programming, and other suitable activities, as per the nature and requirement of the lab course. The experimental lab shall have typically 8-10 experiments and related activities if any.

(Government Aided Autonomous Institute)

AY 2024-25

Course Information	
Programme	B.Tech. (Computer Science Engineering)
Class, Semester	Second Year B. Tech., Sem IV
Course Code	7CS272
Course Name	Web design and Development Lab
Desired Requisites	Basics of web technology, Object oriented programming concepts

Teaching Scheme		**Examination Scheme (Marks)**			
Practical	2 Hrs/ Week	**LA1**	**LA2**	**Lab ESE**	**Total**
Interaction	-	30	30	40	100
		Credits: 1			

Course Objectives	
1	To inculcate programming fundamentals required for full stack web development.
2	To introduce concepts of full stack development and web frameworks.
3	To impart skills for selection of appropriate components from state-of-the-art web framework.
4	To infuse abilities to use state-of-the-art technologies to design and development of a dynamic web application.

Course Outcomes (CO) with Bloom's Taxonomy Level

At the end of the course, the students will be able to,

CO	**Course Outcome Statement/s**	**Bloom's Taxonomy Level**	**Bloom's Taxonomy Description**
CO1	grasp the fundamentals of full stack web development.	II	Understanding
CO2	implement components of state-of-the-art full stack web framework.	III	Applying
CO3	study components of state-of-the-art web framework to fulfil given requirements.	IV	Analyzing
CO4	select suitable web components to retrieve and filter data from the database efficiently.	V	Evaluating
CO5	design and deploy a web application based on given requirements.	VI	Creating

List of Experiments / Lab Activities/Topics

List of Lab Activities:

1. Perform programming assignments on data types and looping concepts in Python programming.
2. Perform a programming assignment on collections in Python.
3. Perform a programming assignment on OOP concepts using Python.
4. Installation and creation of a virtual environment for Django.
5. Implement Django syntax for variables, tags, loops, comments, etc.
6. Work with Django models and the database.
7. Create views and templates to display data.
8. Handle forms and validations in Django.
9. Manage static files and media in Django.
10. Implement Querysets and retrieve data using Django.
11. Implement user authentication of Django.
12. Deploy your Django project to a web server.
13. Design a web application based on given requirements.

AY 2024-25

Course Information					
Programme	B.Tech. (Computer Science Engineering)				
Class, Semester	Second Year B. Tech., Sem IV				
Course Code	7MDCS221				
Course Name	Data Structures and Algorithms				
Desired Requisites:	Programming				
Teaching Scheme		**Examination Scheme (Marks)**			
Lecture	3 Hrs/Week	**ISE**	**MSE**	**ESE**	**Total**
Practical	-	20	30	50	100
Interaction		**Credits: 3**			

Course Objectives	
1	To develop and improve logical thinking and to make the students capable of applying appropriate data structure for solving a given problem.
2	To explain and demonstrate different algorithm techniques for real world problem
3	To provide a foundation to analyse and compare various searching and sorting techniques and to select optimal techniques to solve the problem.

Course Outcomes (CO) with Bloom's Taxonomy Level

At the end of the course, the students will be able to,

CO	**Course Outcome Statement/s**	**Bloom's Taxonomy Level**	**Bloom's Taxonomy Description**
CO1	describe the fundamental concepts of linear data structures and algorithm design, analysis techniques.	II	Understanding
CO2	apply knowledge of computing and mathematics, data structures to solve the problems.	III	Applying
CO3	analyze the various algorithm design techniques for a given problem.	IV	Analyzing
CO4	assess various data structure and algorithm.	V	Evaluating

Module Contents

I	**Introduction to Algorithms** Introduction, Evolution of Algorithms, Design of Algorithms, Need of correctness of Algorithms, Performance Analysis, Recurrence Equations: Solution of Recurrence Equations–Iteration Method and Recursion Tree Methods. Master's theorem, Towers of Hanoi.	6
II	**Linked Lists** Concept of linear data structure, Singly linked list, doubly linked list, circular linked list, Operations such as insertion, deletion, inversion,	6

	concatenation, computation of length, traversal on linked list, Representation of polynomials using linked lists.	
III	**Stacks and Queues** Fundamentals stack and queue as ADT, Representation and Implementation of stack and queue using sequential and linked organization, Circular queue: representation and implementation, Priority queue, Doubly Ended Queue, Application of stack for expression evaluation and for expression conversion, Applications of Queue	7
IV	**Divide and Conquer Method** Binary Search, Merge Sort, Quick sort, Multiplication of Large Integers, Closest-Pair and Convex Hull Problems, Strassen's Matrix Multiplication.	7
V	**Greedy Method** Minimum Cost Spanning Trees, Job Sequencing with deadlines, Knapsack Problem, Optimal Merge Pattern, Huffman Trees.	7
VI	**Dynamic Programming Method** Principle of Optimality, Floyd's Algorithm, Multi Stage Graph, Optimal Binary Search Trees, 0/1 Knapsack problem.	6

CO-PO Mapping		
	Programme Outcomes (PO)	**PSO**

	1	2	3	4	5	6	7	8	9	10	11	12	1	2
CO1	2												2	
CO2	2	3	2										2	
CO3	2	3	2										2	
CO4	2	2	2	2									2	

The strength of mapping is to be written as 1,2,3; where, 1: Low, 2: Medium, 3: High
Each CO of the course must map to at least one PO, and preferably to only one PO.

Assessment
The assessment is based on MSE, ISE and ESE. MSE shall be typically on modules 1 to 3. ISE shall be taken throughout the semester in the form of teacher's assessment. Mode of assessment can be field visit, assignments etc. and is expected to map at least one higher order PO. ESE shall be on all modules with around 40% weightage on modules 1 to 3 and 60% weightage on modules 4 to 6. For passing a theory course, Min. 40% marks in (MSE+ISE+ESE) are needed and Min. 40% marks in ESE are needed. (ESE shall be a separate head of passing)

Walchand College of Engineering, Sangli

(Government Aided Autonomous Institute)

AY 2024-25

Course Information	
Programme	B.Tech. (Computer Science Engineering)
Class, Semester	Second Year B. Tech., Sem IV
Course Code	7VSCS271
Course Name	Innovation and Design Thinking
Desired Requisites:	--

Teaching Scheme		**Examination Scheme (Marks)**			
Practical	2 Hrs/Week	**LA1**	**LA2**	**Lab ESE**	**Total**
Interaction	-	30	30	40	100
		Credits: 01			

Course Objectives	
1	To understand the fundamental concept of innovation and design thinking principles for product and service development.
2	To study the methods of implementing design thinking in the real world.
3	To develop the students as a good designer by imparting creativity and problem solving ability.
4	To propose a concrete, feasible, viable and relevant innovation project/challenge.

Course Outcomes (CO) with Bloom's Taxonomy Level

At the end of the course, the students will be able to,

CO	**Course Outcome Statement/s**	**Bloom's Taxonomy Level**	**Bloom's Taxonomy Description**
CO1	demonstrate the critical theories of innovation & design, systems thinking, and design methodologies.	III	Demonstrating
CO2	apply the diverse methods employed in design thinking and establish a workable design thinking framework to use in their practices.	III	Applying
CO3	critically evaluate the applicability of different models of Design Thinking in business, technology, the environment, and society	IV	Evaluating
CO4	conceive, organize, lead and design the projects in interdisciplinary domain and address social concerns with innovative approaches	V	Designing

List of Experiments / Lab Activities/Topics

Whole course will be delivered as activity / project by team of 3 members (only one team of 4 members) in a practical batch. Each team will identify real world problem / challenge by carrying market survey (in first two weeks). Each team will provide innovative solution to identified problem using design thinking principles as follows :

Week	Activity
1	Introduction to Innovation life cycle
2	Introduction to Design Thinking - Rapid Design Challenge
3	Design Thinking Mindsets; Sustainable Development Goals Team Formation & Team Challenge : Finalizing problem statement
4	**Empathize**: Interviewing Techniques **Empathize**: How/Why Ladders
5	**Empathize**: Empathy Maps **Empathize**: What | How | Why
6	**Define**: Synthesize **Define**: Assumption Storming
7	**Define**: How Might We? **Define**: Customer Personas
8	Team Progress Updates / Review **Explore**: Brainstorming
9	**Explore**: How Might We? Revisited **Explore**: Synthesize and Prioritize
10	**Prototype**: Prototype with Purpose **Prototype**: Examples and Planning
11	**Test**: Prototype for Feedback **Test**: Learn from Feedback
12	**Iterative Design**: Embracing and Learning from Failure **Test & Deliver**: When and Why We Pitch
13	**Test & Deliver**: How to Pitch **Test & Deliver**: Pitch (presentation by each team)

During ESE, each team will submit the activity report.
