Semester – II (IMT, IMG) (A3 Batch) | **Time:** 2:45 PM – 4:45 PM

Faculty: Dr. K. Singya

Total Marks: 20

## SET-A

Q.1   Develop an exercise management application where users can track their workouts and manage their exercise routines. The application consists of two activities:
- **Activity A: Exercise List Activity:**
    a)  Implement Activity A as the Exercise List activity, where users can add new exercises to their workout routine.
    b)  Include a button to add new exercises to the workout routine.
- **Activity B: Workout Summary Activity:**
    a)  Implement Activity B as the Workout Summary activity, where users can view exercises that have been added to their workout routine.
    b)  Provide a back button to redirect to the previous activity.
